

James T. Lee, DO, AAHIVS

Dear Patient

As you may be aware, there is a lot of controversy regarding Adderall. As well, there have been some issues concerning the proper use of this medication. For this reason and to be prepared for any Medical Board review and/or questions, we must institute a policy for the prescribing of Adderall.

If you are taking Adderall, please provide a signed written prescription or physician statement from your psychiatrist once per year verifying that you are taking the correct dosage and should continue on the medication. Should you not have a psychiatrist now, please contact your insurance company for a referral list of doctors available to you.

Once you can provide the document to us, we will be happy to write your prescription for Adderall as recommended by your specialist.

Thank you for your assistance in this important matter.

James T Lee, D.O., AAHIVS
